

Robert Chuang

Senior Mobile App Solution Architect

Technical Portfolio Since 2024-11

 figo007007@gmail.com |  Taichung, Taiwan |  Open to Remote Work

Professional Summary

Senior Mobile Solution Architect with **16 years** of expertise in iOS and cross-platform development, specializing in **AI integration, performance optimization, and complex system architecture design**. Proven track record of migrating server-side AI recognition systems to mobile platforms using **C++ FFI architecture**, achieving **90% performance improvement** (5s → 0.5s response time). Led enterprise-grade applications serving government agencies and Fortune 500 companies. Expert in **Swift, Objective-C, Flutter, C++** with deep experience in **large-scale modular architecture, multi-target management, and cross-platform integration**. Strong advocate for **AI-powered development workflows** and rapid technology adoption.

Core Technologies & Expertise

Mobile Platforms	iOS (Swift, Objective-C), Flutter (Dart), Android (Java)
AI & Performance	On-device AI, C++ FFI, ONNX Runtime, OpenCV, Performance Optimization
Architecture & Design	MVVM, BLoC, Clean Architecture, Modular Design, Cross-platform Integration
Backend Integration	PHP Laravel, RESTful API, Firebase, WebSocket, Push Notifications
Enterprise & DevOps	Multi-target Management, Static/Dynamic Libraries, CI/CD, Team Leadership

Complete Interactive Portfolio

Flutter Face Kit SDK - Complete face recognition solution with downloadable source code, demonstrating server-to-mobile AI migration expertise

Professional Experience Highlights

Current Role: Senior iOS/Flutter Engineer & AI Integration Lead

EZPlus Technology Co., Ltd. | November 2024 ~ Present

Key Achievements:

- **AI System Migration Leadership:** Spearheaded migration of server-side facial recognition system to mobile platform using Flutter FFI + C++ architecture, achieving 90% performance improvement from 5 seconds to 500ms response time
- **Apple Store Compliance:** Successfully overcame Apple's Nested Dynamic Frameworks limitation by converting to static library compilation
- **Enterprise Application Development:** Independently developed employee attendance management system with face recognition, Beacon indoor positioning, and offline-first architecture
- **Cross-domain Technical Rescue:** Rapidly learned PHP Laravel from zero to production-ready, restored enterprise push notification system for multiple apps
- **Open Source Contribution:** Published Flutter Face Kit SDK demonstrating complete face recognition solution with registration + recognition capabilities

Previous Role: iOS Platform Lead & Team Management

SkyEye Satellite Technology Co., Ltd. | October 2015 ~ July 2023 (7 years 10 months)

Leadership & Deliveries:

- **Cross-functional Team Leadership:** Led App team coordination with PM, Backend, UI, and Android teams

- **Platform Ownership:** Served as primary iOS platform owner for all core module development and architecture design
- **API Architecture Modernization:** Led migration from SOAP (.asmx) to RESTful API with multi-tenant support
- **Multi-target Management:** Designed and maintained 10+ customized brand versions
- **Government Contracts:** Waste management apps for Taichung, Chiayi, Yunlin, Kaohsiung
- **Enterprise Projects:** Yamato Transport (Black Cat), Chi Mei Corporation, Global Express
- **National Park Series:** Shei-Pa, Taroko, and Yushan unified platform
